Declaration with the EU Packaging Regulation (PPWR)

Regulation (EU) 2025/40 on Packaging and Packaging Waste

As a manufacturer of industrial measuring instruments, we are committed to complying with applicable European environmental and product regulations. This includes the requirements of Regulation (EU) 2025/40 (Packaging and Packaging Waste Regulation – **PPWR**).

Compliance of Our Packaging

We ensure that the packaging used for the delivery of our products complies with the applicable requirements of the PPWR as they become effective.

Our packaging is primarily intended to protect our products during storage and transportation. For this purpose, we primarily use standard commercially available transport packaging and packaging materials sourced from qualified suppliers.

Evidence of Compliance and Technical Documentation

The conformity assessments, EU Declarations of Conformity and technical documentation required under the PPWR are prepared and retained in accordance with the respective legal responsibilities.

For purchased packaging, we rely on the declarations of conformity and information provided by our packaging suppliers. Where we ourselves are considered a manufacturer of packaging within the meaning of the PPWR, we fulfil the associated documentation obligations under our own responsibility.

The required compliance documentation is maintained in accordance with legal requirements, or its availability is ensured through the responsible economic operators.

Provision of Information

Upon request, we can provide available EU Declarations of Conformity or other appropriate evidence of compliance for specifically identified packaging, insofar as this is possible within the scope of our legal obligations and the documentation available from our suppliers.

Additional technical information and supporting documentation may be provided in accordance with applicable legal requirements, while taking legitimate confidentiality interests into account.

Ongoing Compliance Monitoring

We continuously monitor the implementation of the PPWR and incorporate new or upcoming requirements into our internal compliance processes as they become applicable.

Through this approach, we ensure that our packaging continues to comply with the applicable legal requirements.
