MS

- Switch points: max. 3
- p_{max} : 100 bar; t_{max} : 150 °C
- Connection:
G $\frac{3}{8}$, G 1 $\frac{1}{2}$, G2, 1 $\frac{1}{2}$ " NPT,
2" NPT male, DIN and
ANSI flanges, special
connections
- Material:
stainless steel, brass,
PVC-U, PP
- ATEX Certification
- Connection heads:
aluminium, ABS

Design

Description

Magnetic level switches are used for the monitoring and control of liquid levels in vessels. Magnetic level switches are manufactured to customer specification.

An overview of types available with minimum lengths of measuring tube is set out on the following pages. Please refer to this overview when placing your order. Furthermore any limits can be specified within the limits found in the brochure.

For example:

- Longer measuring tube
- Longer connection cable
- Different cable materials
- Several contacts and different contact operations
- Different materials
- Wide range connections and electrical terminal boxes

Method of Operation

Kobold magnetic float switches are fitted with a hermetically sealed contact which is situated in the tube.

The float sliding on the tube contains a ring magnet whose magnetic field switches the sealed contact in a noncontacting fashion. The sealed contacts are available as N/O, N/C or changeover contacts.

The float sliding up and down on the liquid is the only moving part in the Kobold magnetic float switches.

Advantages

- Simple installation
- Long electrical service life due to sealed contacts
- High-degree of operational reliability with air gap between measuring tube and floats
- Several levels can be monitored with one float
- Open/close function or changeover contact available

Model Codes

	MS05	E	R10	SCX	P
0	_____				
Model	_____				
Measuring tube material	_____				
E	= stainless steel 1.4404				
M	= brass				
P	= PVC				
Process connection	_____				
R10	= G 3/8				
2R8...9AC	= connection box with thread or flange connection				
No. of contacts and function*	_____				
S	= N/O contact				
C	= N/C contact				
W	= changeover contact				
X	= no contact				
Electr. connection	_____				
0	= with housing				
P	= 1 m PVC cable				
S	= 1 m silicone cable				
Y	= special length and type				
ATEX	_____				
0	= without				
E	= ATEX				

Non-standard versions on request

***Please note:**

Contact state referred to empty tank.

Simply link letters for several contacts.

The first letter represents the topmost contact, the second letter the second contact from the top, and so on. The position of the contacts, measured from the sealing edge of the connection screwing, must also be specified.

L1 = highest contact (mm) from the top (sealing edge)

L2 = second contact (mm) from the top (sealing edge) and so forth

Float Design

Model	Form	Materials	Float outside-Ø [mm]	Height [mm]	Bore hole Ø [mm]	Min. liquid density [kg/dm³]	Max. temperature	Nominal pressure at 20 °C
MS05-	Cylinder hollow	PP	42	40	14	>0.5	80 °C	3 bar
MS06- ¹⁾	Cylinder solid material	PP	40	20	14	>0.9	90 °C	100 bar
MS07-	Cylinder hollow	PVC-U	42	40	14	>0.65	55 °C	3 bar
MS10-	Ball hollow	Stainless steel 1.4404	52	52	15	>0.6	150 °C	30 bar

¹⁾ For MS06- model, one float is required for each switch point
 For all other floats two contacts can be operated with one float

ATEX Certificate

Ⓜ II 1 GD Ex ia IIC T6 Ga / Ex ia IIIC T85 °C Da
 -20 ≤ Ta ≤ +60 °C

Connection cable

PVC: max. 70 °C (standard)
 Silicone: max. 150 °C

Please note max.-values of every single model

Technical Details

Hysteresis: 5 mm difference in level

Non-standard versions available

Damping tube for agitated liquids

Float switches with damping tube for agitated or dirty liquids can be supplied upon request.

Temperature monitoring

Float switches with integrated temperature switch, fixed switch point between 60 °C and 150 °C upon request.

Option: Pt 100 available

Supplementary devices:

1. Contact protection relays

We recommend the use of contact protection relays in conjunction with sealed contacts.

Contact protection relays have the following advantages:

- No contact overloads arising from sparking and high currents, which can, for example, be caused by self-induced e.m.f.'s when switching solenoid valves.
- Float switches are electrically isolated from the high voltage power supply system.
- Protection for persons who come into contact with liquids according to VDE 0100.
- Standard models:
 Model MSR-10, 1 channel
 Model MSR-20, 2 channels
 Model MSR-11, 1 changeover bistable
- ATEX-models:
 Model KFD2-SR2-Ex1.W 1 channel, 1 relay output, supply 24 V_{DC}
 Model KFA6-SR2-Ex1.W 1 channel, 1 relay output, supply 230 V_{AC}
 Model KFD2-SR2-Ex2.W 2 channels, 2 relays output, supply 24 V_{DC}
 Model KFA6-SR2-Ex2.W 2 channels, 2 relays output, supply 230 V_{AC}

Cylindrical float made of polypropylene
